WEB PROGRAMMING

WINTER SEMESTER 2025-26

CSS

NAME: SUNESH KRISHNA N

REGISTER NO: 24BCE1925

A college is organizing a technical symposium and requires a single web page to display

event details, announcements, and highlights. The web page must be designed using HTML

and CSS by following standard styling practices.

1. The event title should be displayed using heading tags and styled using a type

selector. All descriptive content related to the event should be displayed using

paragraph tags and styled using another type selector.

2. One important announcement should be highlighted separately using a unique

identifier. This element must have a different color and font size compared to other

content, demonstrating the use of an ID selector.

3. Multiple event highlight sections should share the same appearance. These sections

must be styled using a class selector so that the same styling can be applied to more

than one element.

4. A common font family and base styling should be applied to the entire web page

using the universal selector to ensure uniform appearance throughout the document.

5. Headings of different levels used for sub-sections should share the same styling using

a group selector, reducing redundancy in the CSS code.

6. Headings placed inside a container element should appear differently from headings

placed outside. This must be achieved using a descendant selector, ensuring that

styling is applied only to elements nested within a specific parent.

7. Only the headings that are direct children of a section element should receive a

specific style. Headings nested deeper inside other elements should not be affected.

This requirement must be implemented using a child selector.

8. Paragraphs that contain a style attribute should be highlighted using an attribute

selector. Paragraphs without this attribute should remain unchanged.

9. One specific sentence on the web page should be styled directly within the HTML tag

to demonstrate the use of inline CSS.

10. All selector-based styling rules should be written inside a style tag placed in the head

section of the HTML document to demonstrate internal CSS.

11. Common styles such as font family and base text color should be moved into a

separate CSS file and linked to the HTML document to demonstrate external CSS.

CODE:

```
<!DOCTYPE html>

<html>

<head>

    <title>Technical Symposium</title>

    <link rel="stylesheet" href="styles.css">

    <style>

        h1 {
```

```
    color: darkblue;
    text-align: center;
}

p {
    font-size: 16px;
}

#announcement {
    color: red;
    font-size: 20px;
    font-weight: bold;
}

.highlight {
    background-color: lightgray;
    padding: 10px;
    margin: 10px 0;
}
```

```
        h2, h3 {
            color: green;
        }

        .container h2 {
            color: purple;
        }

        section > h3 {
            color: orange;
        }

        p[style] {
            background-color: yellow;
        }
    </style>
</head>
```

```
<body>

    <h1>Tech Symposium 2026</h1>

    <p>This symposium showcases innovation and
technology.</p>

    <p id="announcement">Important: Registration closes
tomorrow!</p>

    <div class="highlight">
        <h2>AI Workshop</h2>
        <p>Learn about AI and machine learning.</p>
    </div>

    <div class="highlight">
        <h2>Hackathon</h2>
        <p>Participate and win exciting prizes.</p>
    </div>
```

```
    <div class="container">
        <h2>Special Session</h2>
        <p>Guest lecture by industry expert.</p>
    </div>

    <section>
        <h3>Direct Child Heading</h3>
        <div>
            <h3>Nested Heading</h3>
        </div>
    </section>

    <p style="color: blue;">This paragraph has inline style.</p>

    <p>This is a <span style="color: red; font-weight: bold;">very important sentence</span>.</p>

</body>
</html>
```

OUTPUT:

Tech Symposium 2026

This symposium showcases innovation and technology.

Important: Registration closes tomorrow!

AI Workshop

Learn about AI and machine learning.

Hackathon

Participate and win exciting prizes.

Special Session

Special Session

Guest lecture by industry expert.

Direct Child Heading

Nested Heading

This paragraph has inline style.

This is a **very important sentence**.
